

CINTOFLEX MULTIPURPOSE FENCING

The Cintoflex range of protection nets have a multitude of uses such as litter fencing, fruit cage netting, deer fencing and high ball stop netting / perimeter fencing for sporting applications. Unique to TENAX, these nets have a high tensile strength, available in four mesh sizes and can be manufactured in widths up to 4.6m. They are easy to install requiring little support and can be erected to heights in excess of 25m.

ADVANTAGES:

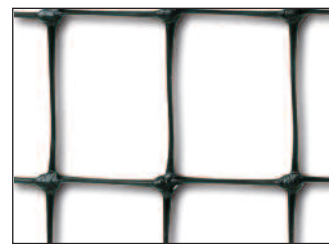

- Cost effective
- Easy to install
- High tensile strength
- Rot proof, UV stabilised and chemical resistant

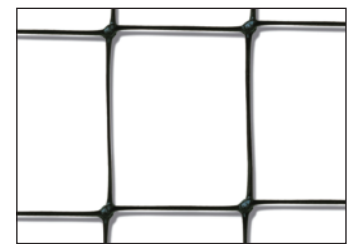

CINTOFLEX E - FRUIT CAGE FENCING

CINTOFLEX M - SPORTS FENCING

CINTOFLEX D - SPORTS FENCING

C-FLEX - DEER FENCING

STERLING PERIMETER FENCE

Sterling Perimeter Fence is a high strength, yet lightweight, heavy duty plastic alternative to galvanised chain link and welded mesh fencing, but unlike metal counterparts it will not rust or corrode. Manufactured from polypropylene it is UV stabilised, chemical resistant and will retain its appearance for many years with little or no maintenance. Because of the built in memory of polymer structures, Sterling Perimeter Fence will quickly resume its natural shape if knocked or crushed.

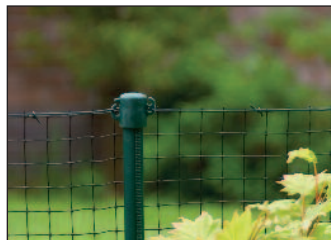

ADVANTAGES:

- Available in heights up to 4m
- UV stabilised, rot proof and chemical resistant
- Alternative to metal fence
- Does not interfere with magnetic fields
- Easy to install with wooden, plastic or metal posts

PRODUCT	CODE	SIZE	WEIGHT	MESH SIZE	MATERIAL	COLOUR	OUTER	PALLET

FENCING SUPPORTS

NETTING STAKE
A plastic coated hollow steel tube with top wire guide for supporting lightweight plastic fencing.

FENCING STAKE
Angled steel post for supporting heavy duty fencing, with pre drilled holes for guide wires.

SUPPORT PIN
For temporary supporting of building site fencing and high visibility fencing.

CABLE TIES
Strong and durable cable ties for joining and attaching fencing to supports.

GENERAL FENCING

This range of extruded plastic mesh and fencing products will be of particular interest to landscapers, fencing contractors, fencing suppliers, house builders and parks departments. When used as perimeter fencing, the polyethylene mesh structures offer many advantages over traditional fencing materials such as post and wire, post and rail and chain-link, in addition to being UV stabilised, cost effective and easy to install.

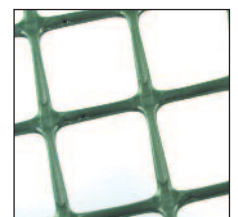

ADVANTAGES:
 UV stabilised
 Rot proof
 Cost effective
 Range of mesh structures
 Easy to install
 Maintenance free
